

Artography is the appropriate term
For my artistic interpretations of Terra Firma
I therefore here present my artographic reflections
Of a world where I detect rhythmic and patterned confections
As well my interpretation of broad panoramic scenes
In novel ways presented through artfully varietal means
Not only the eye but the mind's eye at play
With emotion and image tied in a new way
And let us not forget tableaux of darker mood
Contemplation over which we can well brood
A portfolio one hopes will entertain
As well as enlighten by means of visual refrain
