Artography is the appropriate term

For myartistic interpretations of Terra Firm

I thereforehere present my artographic reflections

Of a world whereI detect rhythmic and patterned confections

As well my interpretationof broad panoramic scenes

In novel wayspresented through artfully varietal means

Not only theeye but the mind's eye at play

With emotionand image tied in a new way

And let usnot forget tableaus of darker mood

Contemplationsover which we can well brood

A portfolioone hopes will entertain

As well asenlighten by means of visual refrain
